PROJECTS

- Health Centre Management System.

A desktop application that has all the functionalities required for managing routine activities of a hospital.

In this, the concerned authority can add details about the patient and doctor and view them according to his need. He can also search for them by just typing his unique identity key. It allows adding, deleting or modifying any patient or doctor's information very easily. It also provides complete transaction details of the patient.

Platform : Core JAVA, Microsoft Access.

- Library Management System

Library management system is basically a desktop application that provides functionalities to view information of a student, the books he has issued, his history, due date for submission, due fine etc. The information can be edited only by authorized staff. It helps the staff to efficiently manage the daily activities in a library. They are given a password which allows them to modify the information.

Platform: PHP, MySql.

OTHER ACTIVITIES / ACHIEVEMENT
